Optimizer Vaults Exercise 2

Intro

There is a hidden way for our vault owner to steal all funds from the strategy contract. Can you find it?

Tasks

Task 1

Implement the `RugContract.sol` under the `contracts/optimizer-vaults-2/` directory. This contract will help you, the `owner`, steal all the tokens from the strategy contract.

Task 2

Now using the `owner` address, rug the vault system!.

Task 3

Bonus question: how can this be done without the use of a `RugContract` contract?
